A FREE BONUS - BINARY TRADING SYSTEM

1. Choose an asset from the TRADE tab

There are hundreds of assets to choose from, and it does not matter which ones you look at. You need to click on the asset name to pull up a CHART of that asset.

2. Examine at the GRAPH of the Asset

Once you click on any asset, you will see a graph of the price. Our system (below) is based on this graph.

3. BUY if price of the asset is in the top 25% of the Graph

If the current price is within the top 25% of the graph, you can place a BUY order. Click the ABOVE (up arrow) button.

4. SELL if price of the asset is in the bottom 25% of the Graph

If the current price is within the BOTTOM 25% of the graph, you can place a SELL order. Click the BELOW (down arrow) button.

5. Enter your Investment Amount

Never invest more than 10% of your bankroll on any one trade. You WILL have losing trades, and proper money management is important. You can invest as little as \$5 or as much as \$1,000 per trade.

6. Place the Trade

The broker will tell you how much your payout will be if you are correct, and what your consolation payout will be if your trade is incorrect. Click the BUY or SELL button after you have entered your investment amount. This will execute your trade!

FREQUENTLY ASKED QUESTIONS...

Do you have a video demonstration of Binary Options trading?

Yes ... please start here: <http://binaryoptionsclick.com>. Watch the video on our home page!

How often does our system generate winning trades?

Our system above is typically correct 70%+ of the time.

What are the BEST trades to take?

The higher the graph is when you place the BUY trade, the higher the odds are that price will continue higher, which of course increases your odds of winning. Conversely, the lower the graph is when you place your SELL trade, the higher the odds that your trade will be a winner.

Do I place High/Low trades, Touch trades, or Range trades?

Our system works only on High / Low trades, so we suggest you only trade these. However, many of our traders prefer to move towards TOUCH and RANGE trades for higher payouts. Please note that these have higher risk as well.

If I do not make money in my first 5 days, will you really give me \$100?

Yes. We know our system works. Simply email us a copy of your trading statement (screenshot) and let us know how you would like us to send your \$100. We will pay you, no questions asked, and answer any questions you have to get you profitable!
